

I don't carry a clipboard.
I carry a violin case and an iPad.

I'm not an assassin, I'm a different kind of surgical specialist...

In hospitality, **profit is your lifeblood**, yet bleeding 10% a year can be the difference between thriving and surviving, or perishing.

Together, we can reduce the bleeding in under 48 hours.

My Role: Observe, Analyse and Advise

My Goal: Empathise and Optimise, not Criticise

Your £570 investment secures a two-day audit, resulting in an expert diagnosis, immediate first aid and after-care solutions.

Specifically built for the owner-operator who needs results, not corporate politics:

- **Night 1: The Grey-Man Diner.** I check in under my name (not my company name) and experience your dinner service as a real guest (before introductions to the team).
 - **Day 2: The Kitchen Shadow.** I put on my whites and embed myself in your service. I'm looking for the "invisible" drains: workflow bottlenecks, wage leaks, and critical Allergen/EHO/Safety liabilities.
 - **Day 3: The Handover.** We sit down with a physical, actionable report including my **Top 3 zero-cost fixes** you can implement that afternoon. Your bespoke report will state:
“Here is where you can save money, this is how you can implement it, here are my observations and suggestions for optimising/streamlining.”
-

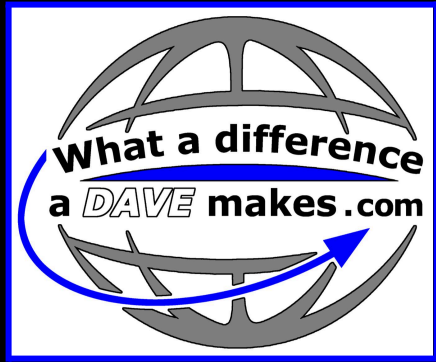

Your investment begins to pay for itself the moment you implement the first fix.

The cost of not doing something is what you're already bleeding, and could cost you everything...

Total Investment: £570 (plus 2 nts DBB).

50% deposit secures your audit. Balance payable on check out.
